DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ronald L. Kimble, Reg. No. 44,186 on 21 June 2004.

IN THE CLAIMS

Please cancel claims 15 and 16 without prejudice or disclaimer.

Please amend claim 1 as follows:

1. {CURRENTLY AMENDED} A process for monitoring a plurality of franking machines, wherein at least one of the plurality of franking machines is connected to a public communications network and at least another one of the plurality of franking machines is not connected to the public communications network, the process comprising:

establishing a link between a management server on the public communications network, and a supervision terminal on the public communications network, wherein the supervision terminal is independent from the plurality of franking machines; and

exchanging data between the supervision terminal and the management server over the established link, including transmitting a current invoicing index corresponding

to the at least another one of the franking machine not connected to the public communications network to the management server and transmitting a code of authorization to frank for validating subsequent frankings of the at least another one of the franking machine not connected to the network to the supervision terminal and wherein the code of authorization to frank is communicated manually to the at least another one of the plurality of franking machine through a user interface; and

wherein exchanging data further comprises displaying at the supervision terminal a list of the entire plurality of franking machines and, a last invoicing index validated by the management server corresponding to each of the plurality of franking machines.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: Because the closest prior art of record does not teach nor suggest in detail exchanging data between the supervision terminal and the management server over the established link, including transmitting a current invoicing index corresponding to the at least another one of the franking machine not connected to the public communications network to the management server and transmitting a code of authorization to frank for validating subsequent frankings of the at least another one of the franking machine not connected to the network to the supervision terminal and wherein the code of authorization to frank is communicated manually to the at least another one of the plurality of franking machine through a user interface; and, in combination with all the limitations of independent claim 1, (see Applicant's arguments received on 07 May 2004, pages 16-29, see the attached

interview, as well as the enabling portions of Applicant's specification, page 5, line 26 to page 6, line 1, page 8, lines 7-18, and Figure 2).

3. The dependent claims further limit the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. **Claims 1-4, 6-11, 14 and 17** are allowable. Renumbered claims 1-12.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Vaughn, Jr. whose telephone number is (703) 306-9129. The examiner can normally be reached on 8:00-6:00, 1st and 2nd Friday Off.
